PROFESSIONAL EXPERIENCE

Front-End Developer   *September 2023 - Current*
Gomed   *Prague, CZ*

- Engineered interactive web applications using HTML, CSS, JavaScript, React, and Material UI, ensuring a smooth and engaging user experience.
- Converted design mock-ups and business requirements into functional, responsive interfaces, optimizing usability across desktop and mobile devices.
- Linked RESTful APIs to enable real-time data updates, improving responsiveness and interactivity.
- Reviewed, tested, and debugged front-end code, cutting UI-related bugs by 35% and improving application stability
- Researched and implemented emerging front-end technologies to enhance functionality and keep the platform competitive.

Software Developer Intern   *January 2023 - April 2023*
Showing Guide   *Brooklyn, NY*

- Established REST APIs that streamlined communication between the front-end and back-end, reducing data transfer delays.
- Connected the OpenAI API with multiple real estate platforms, enabling smarter property recommendations and improving search accuracy.
- Worked alongside engineers to debug and refine API interactions, ensuring stable performance across the application.
- Revamped the Angular UI by fixing layout inconsistencies and enhancing responsiveness, making the platform more intuitive for users.

Software Engineer in Training   *June 2022 - September 2022*
Coding Temple   *Brooklyn, NY*

- Designed a full-stack social media app using the MERN(MongoDB, Express.js, React, Node.js) stack, allowing users to share and explore travel tips, which increased engagement and interaction.
- Implemented a secure authentication system with Python, Flask, and Bootstrap, streamlining the signup and login process while protecting user data.
- Built a JavaScript weather widget that fetched real-time data from public APIs, enabling users to check weather conditions instantly.
- Optimized a PostgreSQL database, improving data storage efficiency and reducing query response times.
- Developed an e-commerce platform and an interactive game using Python and object-oriented programming, demonstrating versatility in software development.
- Integrated APIs with Axios and rigorously tested them using Postman, ensuring accurate and efficient data flow between front-end and back-end.
- Created a Java-based note-taking app, enhancing productivity by providing users with a structured way to manage tasks and information.

Front-End Developer   *May 2020 - April 2022*
TebeP   *Brooklyn, NY*

- Redesigned company's e-commerce platform, leading to an 8% increase in sales and better user retention.
- Refactored front-end components, making the UI 30% faster and improving mobile responsiveness.
- Collaborated with the engineering team on weekly code reviews, ensuring high-quality releases.
